

Project with Cal-Earth Foundation

In a humanitarian response to the earthquake that devastated parts of Pakistan in October 2005, the Sasi Foundation collaborated with CalEarth USA and Government of Pakistan to assist in rebuilding shelter from the onset of winter. The Sasi led team voluntarily undertook the largest community based participatory reconstruction drive ever where all Pakistanis joined with compassionate people worldwide in assisting the people in the earth quake affected regions. The main support was in the form of training members of the Pakistani Army, Jammu Azad Kashmir officials and NWFP government officials in theory and practice of constructing Super Adobe Domes.
