

Brokerage Service Firm in Emerging Markets

This project will establish a brokerage firm that is a "portal marketing service and investment management" entity, that links high net-worth clients, multinationals, foreign missions, financial institutions and corporate clients to investment opportunities in the emerging markets around the world. The firm's plans include development of an international side that offers investments in real estate to residents of the U.S. and Canada who have SAARC origins, focusing on skilled and well established professionals and business entrepreneurs.
